ECHO MEETING.

Mrs. A. J. Clarke Yesterday Made an Address to W. C. T. U.

ON THE WORLD'S AND NATIONAL

Conventions, Hold Recently at Toronto and Buffalo, Respectively-Mrs. Clarke Attended Both, and She Recounts Many Interesting Experiences-Phere Were In

At the regular meeting of the W. C. T. U. yesterday afternoon, the mem-bers and the visitors present were delightfully entertained by Mrs. A. J. Clarke, who attended the recent world's and national conventions of the organization, held at Toronto, Canada, and Buffalo, N. Y., respectively. Those things which impressed her most at those great gatherings were interestingly related.

The meeting was held at the Fourth Street Methodist Episcopal church, Mrs. Jennie P. Sisson presided, and after the usual routine business was disposed of Mrs. Clarke gave her talk. As a visitor she attended the world's convention, which was held at Toronto, from October 23 to 26, but she was the state delegate to the national, which was held in Buffalo, from October 29 to November 24. She first explained the

different modes of representation to the world's and national conventions. The former consists of the executive officers of national branches, and the delegates sent to it have but little voice in some of its affairs. One reason for this fact is that representation by a country's membership, would in a country like the United States, where the W. C. T. U. is so strong, swamp the other countries.

Mrs. Clarke very graphically pictured the scenes at the Toronto convention. The vast convention hall was profusely decorated with flags of all nations, streamers and flowers, and interest and enthusiasm were great in all the proceedings. The address of the president, Miss Frances E. Willard, was full of good things for the cause. Great strides had been made since the last blennial convention in London, Temperance legislation, charitable institutions, missionary work, the Armenian massacre, and other philanthropic questions, with the steps taken toward their advancement, received careful consideration in Miss Willard's report. Very successful was the work as shown by the report of the world's secretary, Miss Annie Slack, of Devonshire, England. Her report treated of the gain in membership, compulsory education, woman's suffrage, etc. Details were given of the work in Alaska, Australasia. Brazil, Newfoundland, Egypt, Uruguay, New Zealand, Transvaal, India, Mexico, the Bahama, Scandanavia, Bulgaria, Ireland, and the other countries not known in the earlier history of the Women's Christian Temperance Union.

The monster petition which reached from All Massey hall seven times, was shown and attracted great curiosity. An English lady had spent two years in tacking the different parts of the petition from all countries into this large one. As Mirs Clarke was describing its length, a member present interjected the remark that "Mother" Holliday was one of the first singers to it. Another picturesque feature of the convention of the convention was the tableau, formed by delegates from Syria, Armenia, Japan, Iceland, Finland, Spa

Daughters, Ladles of the Macabees, Canadian Methodst ladles and others. The American delegates' introduction was a feature, and their reception was most enthusiastic and cordial.

Among the topics discussed were "Scientific Temperance Instruction in Schools." and "Arbitration." These two prominent subjects received unanimous endorsement. As there necessarily was a lot of statistics read in the reports, the sessions never approached the monotonous, music and addresses by foreign delegates continuing the deep interest. One of the prettiest spectacular effects was the flag drill silven one evening, by Toronto school children. There were three sets of girls, one group dressed in the British colors, the second in the American, the other representing all nations. A little girl from each group made a spiendid address, reflecting her careful training. After marches and countermarches the drill concluded, but, said Mrs. Clarke, "I noticed that at the close the British colors were formed around all the others, and, of course, I didn't like that."

Another remarkable feature occurred one evening when one hundred addresses were made by one hundred delegates in one hundred minutes. What applied to the Toronto gathering in a great sense was reflected in that at Buffalo.

to the Toronto gathering in a greateness was reflected in that at Buffalo sense was reflected in that at Buffalo. Mrs. Clarke covered the ground pretiy thoroughly in telling of the chief incidents of the national convention, which was really more important in some ways. The differences between Lady Somerset and Miss Willard, and the temple matter, were questions that attracted attention outside of the W. C. T. U. President Willard's address touched upon these matters, and the convention was with her at all times, especially during her affecing address. The temple question was disposed of by accepting the suggestion of Miss Willard, who will make an effort to retire the \$300,000 bonds without imposing any dues for that purpose on the different branches. This was decided on in a secret session, and deep feeling in a secret session, and deep feeling was displayed in reaching this decis-

was displayed in reaching this decision.

There were strong protests against the Bacchanate, about to be placed in the Metropolitan Art. Museum. New York, and how best to promote temperance legislation was a quention receiving full discussion. There were many inspiring scenes in Buffalo. At the close the state sours were nearly all sung. Had West Virginia been reached, Mrs. Clarke, Mrs. W. J. Hamilton. Mrs. D. C. List, ir, Miss Hettie List, and Mrs. N. C. R. Morrow, the West Virginians present, were ready to have responded. There were many affecting scenes as well, and Mrs. Clarke paid an eloquent tribute to Frances E. Willard.

Insufficient time prevented Mrs. Insufficient time prevented are.
Clarke from going into more detail regarding the Buffalo gathering. Her remarks were engerly listened to, and at the close of a splendid talk, the meeting adjourned by tendering her a vote of thanks. Mrs. Clarke's talk was indeed a treat. indeed a treat.

THE RAILROADS.

The proposed through service of passenger trains between Parkersburg and Pittsburgh, via Wheeling, on the Ohio River and Pan Handle roads, will not go into effect with the change of time on the two roads next Sunday, as had been anticipated. The change does not seem likely to be consummated before seem likely to be consummated before next year. One point of difference was the different systems of car heating on the two roads, making it necessary for one of the two to make expensive alterations which neither desired to do at this time. The air brake apparatus, too, is of different design. It is likely the smaller of the two roads, the Ohio River, will gradually changel its apparatus to conform with that of the big Pan Handle system, after which the proposed through service will follow speedily.

CHANGE OF TIME.

Although a change of the passenger schedules of the Pan Handle and Ohio River roads is announced to take place next Sunday, the local officials of the two roads have not yet been noti-fied of the changes.

ONE CAR ORDERED.

General Manager Henry Weisgerber, of the Wheeling & Elm Grove Rallway Company, has ordered one electric car Company, has ordered one electric car for the city division of the road, and it is expected to arrive within four weeks. It is being built by the Brill works, in Philadelphia, which has built all of the Elm Grove's cars in recent years. As soon as the car arrives the city electric division of the road will be placed in operation. Power will be had from the Wheeling company, or from the Suburban Light Company's plant east of the city.

THE POWER HOUSE.

The Wheeling & Elm Grove Railway Company has not yet decided on the locompany has not yet declared on the lo-cation of the power house, which will be necessary when the motive power of the line is changed from steam to elec-tricity. Several sites have been con-sidered, but a decision will not likely be arrived at for some time.

A RIGHT-OF-WAY SCRAP.

At the meeting of the town council of Fulton, the ordinance, granting the Wheeling & Elm Grove Railway Company right of way along Center and other streets for the second track which will be needed when the road places its electric line in operation, was again laid on the table. The same action had been taken before for some reason. This time the council desired the railroad company to pave Center sfreet from curb to curb, along its entire length. This demand was considered unreasonable by the railroad people. For the paving of the street, the council proposed to exempt the railroad from taxation. The railroad company now threatens to change its route for the second track. The change proposed is to do trestle work along the creek bank outside of the Fulton corporation. Fulton people affect to believe that this is a bluff on the part of the railroad company. Wheeling & Elm Grove Railway Com-

A NEW B. & O. BRIDGE.

A NEW B. & O. BRIDGE.
Quite a number of miles of new 80pound sieel rail has been laid on the
Columbus and Néwark division of the
Baltimore & Ohlo, replacing sixty-seven
pound rails. Almost haif a mile of
trestle has been converted into an embankment on the same division. Other
improvements on the Baltimore & Ohlo
lines west of the Ohlo River, include a
four-span steel bridge, six hundred feet
long, across the Muskingum river at
Zanesville, and two iron bridges on the
Midland division. A new passenger
and freight depot has been built at
Wooster, and a new freight house at
Bellaire.

COWEN ON THE B. & O. In speaking of Baltimore & Ohio rail-road affairs Receiver John K. Cower

In speaking of Bailmore & One fair road affairs Receiver John K. Cowen said:

"The general tendency of railroad rates has been downward, and the absence of the power of agreement among railroads has prevented any control over this situation. A slight shrinkage in the rate per ton per mile, although not appearing in the unit of consumption of the article handled, is capable of playing havoe with a railroad. If the Chicago & Northwestern, the C., B. & Q. or the Rock Island were forced to do business at the rate ton per mile which the present rate demoralization compels the Baltimore & Ohlo to take, these strong lines would be reduced to insolvency. On the other hand, give the Baltimore & Ohlo the rate per ton per mile which these lines receive and it will earn 5 per cent in \$500,000,000. One mill increase per ton per mile on the business now handled by the Baltimore & Ohlo would not only pay all of its fixed charges, but would leave a snug sum for a stock dividend.

"Further, had rates remained the same as they were in the previous year, instead of a deficit there would be a surplus from operations. Yet the decrease was only 685 part of a cent per ton per mile. Surely the consumer who bought the products thus handled by the pound reaped no benefit from such a trifle. Recognizing this tendency in rates, it

reaped no benefit from such a trifle. Recognizing this tendency in rates, it can be overcome only in the handling of an increased volume of business. To put the Baltimore & Ohlo railroad in such physical shape to do this has been the policy of the receivers. The expenditure of large sums of money was necessary to secure this, and with the 50,000 tons of steel rails to be latd during this fiscal year the cost for maintenance of way will again be large. But these are permanent improvements, and the emergency calls for the doing in a year what in ordinary conditions would spread over a number of years.

Improvements have been made in grades and track between Baltimore & Cumber'and at a cost of about \$190,000, and this sum will be eased annually to a cost of about \$190,000, and the sum will be eased annually to an annually to a cost of about \$190,000, and the sum will be eased annually to a cost of about \$190,000, and the sum will be eased annually to a cost of about \$190,000, and the sum will be eased annually to the sum will be eased annually to the sum will be eased annually to the sum will be accorded. reaped no benefit from such a

Cumber'and at a cost of about \$190,000, and this sum will be saved annually in and this sum will be saved annually in the cost of handling business on this part of the road. The Baltimore & Oblo has suffered for the want of cars and is still losing tusiness on this account. Instead of securing 5.000 new cars, as were authorized, had 10.000 been obtained business which is now being offered and cannot be handled could be carried and the earnings would be largely increased. There has been \$500,000 worth of traffic which we have been forced to turn down during the past two months because we did not have the cars to haulit. Regular tariff rates were offered for this business, and had the road 5.000 more cars it could bring to Baltimore during the month of November for export 6.000,000 bushels of grain at the regular transportation grain at the regular transportation charge. With the present resources of the operating department of the road the gross carnings could be increased to \$33,000,000 and the business handled without

a proportionate increase in expenses.

"After reaching a certain level with the tonnage handled it is on the business." a proportionate increase in expenses.

"After reaching a certain level with the tonnage handled it is on the business above that limit that the chief profits of railroads are made. Despite the elight margin per ton per mile, after the level of operating expenses is reached the surplus business may be carried at a profit of 50 per cent. Opposition to the Baltimore & Ohto getting additional equipment has been costly to the property. What does the one hundred and forty millions of dellars locked up in the road and its operated lines amount to without the vitalizing effect of rolling stock? Trackes, terminals and the other expensive accompaniments are fit only for the junk pile if equipment is lacking to develop their fullent usefulness. Any interest in the property which stands in the way of securing this needed equipment is pursuing a course unaound in the finance of railroads and hurtful to their own interests."

ANOTHER TEACHER

Will be Added Shortly to the High School Faculty.

CHOOL REPORT TO BE MADE

Annually in Pamphiet Form, a Feature of Supt. Anderson's Monthly Report to the Board of Education-Botany Advocates Defeat English History enthusiasts in a Slight Skirmish-A Brief Session.

It is seldom that the board of education transacts all its business in less than one hour's session, but that was the case last night. Nothing much of the unusual was considered, and high school matters were to the fore. In the absence of President Jefferson, Dr. Jepson was called to the chair. Clerk Hall's roll call showed the fol-

lowing members present: Brock, Birney, Bowers, Dudley, Hubbard, Jepson, Kasley, Maxwell, McConnell, Miller, Nesbitt, Noble, Schaub, Stanton, Waterhouse; absent-Buckman, McNash, Milligan, Riheldaffer, Weldman and

Payments were authorized as follows

Payments were authorized as follows:
Accounts, \$457.44; library, \$155.71. The purchase of books to the amount of \$71.09 for public library, was approved and the appointment of Miss Emma J. Garden as substitute librarian was also approved. The committee on buildings and grounds submitted bills totalling \$2,057.36; ordered paid.

The committee on text books reported that investigation had been made relative to the introduction of botany or zoology into the high school course. The study of zoology was not deemed expedient, and while the committee had agreed on the work to be used in teaching botany, it was thought that more satisfactory results to the siudents would be attained if English history was substituted for botany. Botany is already in the course, but its study doesn't begin until January, and is to be taken only in the second year of the course.

This report precipitated some discussion. Mr. Stanton argued for English history in place of botany. Col. Miller argued for the retention of botany. Mr. Noble wanted trigonometry inserted. The resolution to retain botany was adopted. Berger's botany was selected. Superintendent Anderson submitted his monthly report. In it he recommended that there be published an annual report of the schools in pamphlet form, the report to include the school and fiscal year. The report shows:

SCHOOLS.	Enrollment for the Month.	Average Dally At-	Average Dally Ab sence,	Per Cent of Attend-	No. Perfect in Attendance.	Amount Paid for In- struction.
High School Washington Madison Clay Union Centre Webster Ritchie Lincoln	583 681 578 522	260 502 634 512 458 398 569 819 195	48 23 27 23 26	98 94 97 94 95 94 93 93	206	\$1000 629 823 618 655 564 769 874
Totals	4877	4347	263	95	2024	\$6385

The recommendation of the superin-

tendent to publish an annual report was referred to the committee on teachers The contract for furnishing indigent uplis with books was awarded to E.

pupils with books was awarded to E. W. Tuttle.

The committee on teachers and schools deemed it expedient to defer the election of a supervisor of drawing, and recommended the employment of an additional teacher in the high school. The report was adopted.

The high school teachers requested that next Friday after Thanksgiving be made a holiday. This led to a motion to make the holiday apply to all the schools. But Colonel Miller's fount of parliamentary law settled the matter for aye. He intimated that holidays could be made only after a suspension of the rules. A motion to suspend was lost, and the holiday went gilmmering.

AMUSEMENTS.

Willie Collier and company were the attraction at the Opera House last night, and were greeted by one of the largest audiences of the season, every seat on the lower floor being occupied. Collier has the best piece he ever appeared in, in "The Man From Mexico." which is funny from beginning to end which is funny from beginning to end in the fast and furious style. The intricacles of the plot keep the audience on the tip-toe of expectation and suspense throughout the development of the plece, and the situations evolved in the second act are especially and deliriously side-splitting. Collier's convict make-up is the acme of realism, and the setting given the second act, the scene of which is the famous Blackwell Island, is excellent. The star's support is excellent throughout. A return engagement should be had by all means. is excellent throughout. A return en-
